

UNITED CHURCH NOTES

A Presbytery Sunday School Institute has been arranged, to meet in Wainwright Friday evening, October 8th. Topics of special interest to our Sunday School workers will be introduced and discussed. It is to be hoped there will be a good attendance from the Irma charge.

Services for Sunday, October 3rd, are as follows: Passchendale 11 a.m., Crescent Hill 3 p.m. and Irma 8 p.m. The girls of the Mission Band will sing at the evening service. Chorus "Good-night, Little Flowers" and a duet "Our Heavenly Father." A hearty welcome extended to all.

MUSINGS

Ho! Hum! Saturday again! I 'spos pa is going to town. Shall I go? Well, I'll just get The Times and see what's going on. Hm! A sale! Yes, and the stores have a good line-up of bargains. But then, I'm always thru long before pa is ready. Well, let's look at The Times again (what should I do without our local paper). Oh, goody, the Anglican ladies are having a tea and sale of home cooking, serving supper. How nice to go and have a cup of good tea and spend a pleasant while with friends I'm sure to meet there, and perhaps just for once I could coax pa to come and have supper. Yes, I think I'll go to town!

V. Hutchinson, Irma

Viking Items.

Mr. and Mrs. Harry Meredith and Miss Verna were host and hostesses at a re-union banquet held in the Viking hotel last Sunday, September 26. The occasion being the 82nd birthday of their father, Mr. Joseph Adams of Vegreville, Alberta. The guests present were: Mr. and Mrs. Adams and daughter Miss Ethel, Vegreville; Mr. and Mrs. Lionel Adams and son Melville, Lamont; Mr. and Mrs. Hugh McPherson and baby Jack (great-grandson), Lamont; Mr. and Mrs. Walter Adams, Vegreville; Mr. and Mrs. Reg. Adams and son Keith, Edmonton; Mr. and Mrs. Alec Adams and little daughters, Doreen and Audrey, Wainwright. After a very enjoyable repast the guests returned to the Meredith residence, where the remainder of the day was happily spent.

The reorganization of the men's bridge club will be held in the Anglican parish hall on Tuesday, October 5th, at 7.30 o'clock, for the purpose of arranging a winter schedule. Any bridge team interested are invited to attend this meeting or see J. L. Slavik or Harry Lawes. Cards will be played after the meeting.

The first meeting of the Bruce local A. T. A. was held in the Bruce school on Saturday, Sept. 18th.

The following officers were elected: President, Mr. L. C. Hergott, Bruce; Vice-President, Mr. Van Horne, of Bruce; Secretary-Treasurer, Miss G. Bruce, Mayflower; Press Correspondent, Miss Jean Foster, Bruce.

A discussion followed on the possibility of forming a school fair and the group is anticipating an address on this subject from Mr. Mahler, of the Vermilion school of agriculture.

Mr. Van Horne was appointed to report on the Vegreville teachers' convention.

Future meetings will be held on the first Saturday of each month.

The regular monthly meeting of the Poplar Hill sunshine club will be held at the home of Mrs. John Reishus on Wednesday, October 6th, at 2 p.m. Each member is asked to bring an idea or pattern to make a new article from old material. On the contest for the afternoon requests each member to come representing a book.

During the past ten years the village mill rate of taxation has been reduced from 84 mills to 31 mills. All debenture payments, salaries and expenses are paid up to date.

Little Gertrude Sangster has been quite sick with influenza. Also Carson Jackson suffered a short attack of flu.

Lord Tweedsmuir at Jasper

During his recent trip to the West, His Excellency Lord Tweedsmuir stopped off at Jasper Park Lodge in Canada's largest National Park. Here, in front of the golf club house, he discussed

golf and other subjects with Captain H. Canale (seated with Lord Tweedsmuir) and Charles Duncan (standing) golf professional at the Jasper Park course. — Canadian National Railways photograph.

The Women's Institute

The monthly meeting of the Women's Institute will be held on Thursday afternoon, October 7th, at 2.30, at the home of Mrs. A. Harper of Jarow. The roll call will be answered by "Amusing incidents that happened at our Institute meetings." Hostesses, Mrs. W. Cole and Mrs. Meakins. Mrs. Pryce Jones was the winner of the cake raffled at the silver tea held on Wednesday, September 22nd, at the home of Mrs. R. C. McFarland.

—Mrs. C. Wilbraham, Sec'y

FAMILY RE-UNION

Last week the Peterson's and Stewart's of Irma and Wainwright sent out their clan call to the far corners of the U.S.A. and Canada for a grand re-union to be held at Mott Lake, the famous Buffalo Park playground south-west of Wainwright, on Sunday, September 26th.

The result was that sixty-two persons in all gathered for this celebration, coming from Florida and California in the sunny south to the chilly plains of Northern Saskatchewan and Alberta. Some of the older members of this clan had not met during the last thirty-five years and of course many of the younger ones had never met before. Incidents which had occurred years ago were re-told and the many changes since the early days when the older ones came to Canada were brought to mind at this great gathering. On account of the chilly weather the banquet tables were laid in the pavilion and were loaded with all the good things that could be wished for.

Before this re-union broke up several photos were taken which no doubt will be carefully preserved in memory of this great event.

IRMA G. G. I. T. NOTES

The Irma G. G. I. T. started the term by having a taffy-pull at the home of the leader, Miss Aletha Knudson on September 2nd.

The next meeting was held in the Irma United Church on September 9. At this meeting the following officers were elected:

President—Ruth Reeds.
Vice-Pres.—Edna Arnold.
Secretary—Deloraine Stockton.
Treasurer—Evelyn Elford.
Press Reporter—Jacqueline Tate.
Planner—Lois Longmire.

Game Convent—Marjorie Webber.
On September 16th four new members were initiated. A formal opening ceremony for the coming C.G.I.T. year followed the initiation.

On September 23 after the devotional and business part of the meeting was over, each girl wrote to some young person in another part of the world.

Wedding Bells

WIENS — BAERGEN

A quiet, pretty wedding was solemnized at the home of Mr. and Mrs. G. J. Baergen, Irma, on September 12 when their daughter, Margaret, and Mr. J. B. Wiens of Herschel, Saskatchewan, were united in holy wedlock.

Rev. D. Heidelrocht of Tofted performed the wedding ceremony, after a short and fitting address to the bride and groom.

After the ceremony a tasty lunch was served.

During the cosy twilight hour a number of young people gathered around the young couple indulging in some old German and Russian folk songs.

The newlyweds left early Monday morning for East Coulee, where Mr. Wiens works as weighman for the Murray Collieries.

CARS, TRUCKS and TRACTORS OVERHAULED

A. T. A. RALLY HELD IN IRMA

A large number of teachers attended the annual Fall rally of the Wainwright-Viking A.T.A. held in Irma on Saturday, September 18th.

Mr. Barnett, Mr. Shortcliffe, Mr. Powell and Mr. Harman, all of Edmonton, gave very enlightening addresses.

At the conclusion of the meeting a banquet was served to about forty teachers by the Ladies' Aid of the United church. After enjoying musical numbers by local talent, the teachers spent the remainder of the evening in dancing.

There will be a pre-Easter meeting of the A.T.A., but as yet the date has not been set.

SEED FAIRS

H. W. Scott, district agriculturist of Camrose, announces that the junior wheat club of Jarow will hold their Seed Fair on Friday afternoon, October 15th, and that the Irma junior wheat club will hold their seed fair on Saturday, October 16th. All farmers and others are cordially invited to attend.

AUCTION SALE OCTOBER 2

An auction sale of household furniture and other articles will be held at the home of Thos. W. Shaw, Irma, on October 2nd, at 2 o'clock p.m. For further particulars see hand bills. 24-1p

If you have something valuable that you can't use and somebody else may want, an advertisement in this paper will sell it for you. Try it.

**Loyalty Is Needed**

To all who are interested in the development of the Hudson Bay route as a means of transport for commodities in and out of the Canadian west, and that should mean all residents of the prairie provinces, statements appearing in the 1937 report on Hudson Bay marine insurance rates by the Imperial Shipping Committee should convey assurance for the future of the short route between Europe and the middle west of the northern part of this continent.

The report announces reductions in, and advantageous changes in conditions relating to, marine insurance rates on cargoes handled through Churchill, indicating a potential lengthening of the shipping season for the route and, above all, for the first time in the eight years the route has been in operation, the committee voices its confidence in the comparative safety of the route, as expressed in the following excerpt:

"Eight seasons have passed since the new route was opened. The way is well charted and well equipped with aids to navigation. The exceptional circumstances on account of which the warranty is imposed—ice, fog and magnetic disturbance, are known and have been provided against by the gyro compass, direction finding and the very efficient escort of the Canadian patrol vessels.

"It is true that should a casualty occur, some time might elapse before salvage operations could be undertaken, and should the casualty be a very serious one or one which occurred towards the close of the season, salvage might be impracticable. Even though a Canadian government patrol vessel happened to be available for salvage operations, to suspend its normal activities of escorting other vessels might have unfortunate results.

"Nevertheless, so far as physical risks are concerned we are convinced that the Hudson Bay route is no more dangerous, and in some respects less dangerous, than the St. Lawrence route. As against this, there still remains the fact that with the present small number of voyages a single total loss in a season is a serious matter for the underwriters."

An excellent feature of the report is the announcement of a reduction in marine insurance rates of 2.64 per cent. on cargo carried in vessels using a gyro compass. This is a very desirable proviso, as it is essential that boats making use of the route be equipped with as many as possible approved devices calculated to lessen the risk of navigation through the strait and in the bay.

The "Avon River," the sole casualty of the 1936 season, which was driven on a reef without loss of life, was one of two boats using the route last year that did not carry a gyro compass.

It is true, however, that the lack of a gyro compass was not the cause of the disaster to the "Avon River." The committee quotes the London Board of Trade as declaring that the disaster was due "not to any special perils of the route, but to the unusually severe weather conditions which were experienced throughout the world in the latter part of 1936, during which an unusually large number of ships were lost."

The basis on which the reductions have been made and the establishment of the gyro compass as standard equipment for well-founded tramp steamers using the Hudson Bay route give some assurance that decrepit old hulks are not likely to use the route and thus imperil its growing prestige by foundering and imperiling the present rate structure.

Despite the favorable nature of the report, the reduction which has been made in the insurance rates and the encouragement which is being given to ensure safety measures, prejudice against the route in Eastern Canada and apathy in the West as to its fate in the future have not entirely disappeared. Only recently in the mouthpieces of financial interests in the east have appeared evidences of prejudice in the form of attacks against the route, founded principally on a material reduction in traffic through Churchill this year and the fact that this infant route is not yet on a self-sustaining basis.

The tenor of such articles is grossly unfair as they omit to tell the whole story. No reference is made to the fact that the West is suffering from the greatest drought in history, resulting in a lack of grain available for shipment, nor is it pointed out that during the season futures prices have so closely approximated cash grain prices as to make lengthy storage economically unfeasible.

These attacks indicate that the enemies of the route are not sleeping, and it behooves the people of the west to demonstrate their loyalty to the Hudson Bay route by giving it their support on every possible occasion and in every possible legitimate manner.

If consumers in the prairie provinces, farmers in the country and business men in the urban centres would make it their business to express preference for goods shipped through Churchill their demands, if sufficiently insistent and persistent, would ultimately bear fruit and result in the increased volume of traffic which is essential if the route is to be speedily built up to sizeable capacity. If more goods are brought in through Churchill more boats will make use of the port for outbound cargo and the greater the speed with which traffic is developed the sooner will rates be further reduced.

Perfect Gasoline Tank

British Invent Tank For Aeroplanes That Will Avoid Danger Of Fire Gasoline fires after aeroplane crashes may soon be a thing of the past. The Air Ministry has perfected a gasoline tank which is crash, leak and fireproof. Following success of 13 years of experiment, the safety tanks will be placed in both war planes and civilian planes. In trials the tanks were fired at with incendiary machinegun bullets. There was no resulting fire. A tank was dropped on concrete when a plane was deliberately crashed at 50 miles an hour. The tank merely bounced, and not a drop of gasoline was spilled.

Greater London's luxury trades including millinery, jewelry and clothing now find employment for 58,000 persons.

Definitely Under Par

Harvard Scientist Has Discovered Sun Is Anemic

The sun is only sevenths as bright as it should be among stars of its type, it was disclosed by research at Harvard University. In the same study, made by Dr. William A. Calder, it was reported that the moon is slightly brighter than astronomers hitherto have believed.

Harvard observers, commenting on the discovery, resulting from a new determination of the radiations emitting from the sun and moon, said that it gave scientists their first indications that the sun definitely was "under par."

Once a year Buddhist worshippers fill a Tokyo temple, pray and offer incense in gratitude to the spirits of silkworms and cotton plants for their "sacrifice" in giving silk and cotton to mankind.

One wonders how much of Canada is really seen by all the tourists who try to cover as much ground in 24 hours as their cars and constitutions will stand.

Proper Lighting Needed

Prevalence Of Defective Eyesight Due To Poor Illumination

The fact that more and more people are now using their eyes indoors at severe visual tasks, and neglect of proper lighting conditions are responsible for the prevalence of defective eyes according to Chas. O. Bick, clinical instructor of the College of Optometry of Canada, writing on "Must we wear specs?" in the current issue of "Health," organ of the Health League of Canada.

Glasses alone can never bring relief when eyes are abused by prolonged use under the harmful lighting conditions which exist in most offices and homes, writes Mr. Bick.

Most levels of illumination have far reaching effects on almost all bodily functions, he claims. "At present only a beginning has been made in the effects of illumination on the home seeing-machine."

Employers of labour should see to it that factory workers and office workers are given an opportunity of working under better visual conditions, the writer claims. "We expect them to do their work efficiently and they should be given the means to do that work efficiently." Elimination of useless waste of energy on their part will result in increased productive work for employers.

Habitual Criminal

Spinal Fluid Is Said To Reveal This Tendency

Two Chicago doctors said that nine years' research had led them to believe they could determine whether a criminal was a "confirmed repeater" by examining the "curve type" cells of his spinal fluid extracts. The doctors, S. W. Brownstein, of the Board of Health, and M. H. Levy, of the Cook county jail staff, said microscopic examination of spinal extracts of criminals disclosed a ratio between the men's tendencies to re-enter a life of crime and an abnormal cell count. Nine prisoners who had proved themselves habitual criminals were used in experiments.

ALICE STEVENS' RECIPES

BALANCED MENUS CONTAIN SIX FOODSTUFFS

We hear a good deal these days about balancing budgets in the home as well as in political and business circles. Balancing menus is equally important.

Many housewives fight shy of the term "balanced menus" because they do not understand the meaning of the term. A balanced menu is one that keeps the body in health and supplies the necessary food for growth.

A diet must contain six foodstuffs to meet these requirements. Fats and carbohydrates are required to supply the body with heat and energy. Starches and sugars are included as carbohydrates.

The body requires food for new growth and for repairing old broken down tissues. This is supplied by protein foods in the diet. Some of the more common protein foods are egg white, milk, peas, beans, fish, meat and cheese.

Mineral matter, water and vitamins are needed to regulate our bodies and to keep them running smoothly. Vitamins are said to correspond to the spark of the engine. These three food stuffs are found in a number of foods but are particularly abundant in milk, eggs, fruits and vegetables.

All of these foodstuffs are found in the following menu: Liver Casserole, baked potatoes, creamed carrots, brown bread and butter, apple crumb pudding.

LIVER CASSEROLE

2 onions
2 apples
1½ pounds calf liver
2 medium potatoes
Salt and pepper
1 teaspoon sage
Cut onions up fine. Put liver in boiling water. Lift out after a few minutes. Put a layer of liver in the casserole. Add one layer of each, onions, potatoes, and apples. Add salt, pepper and sage. Repeat with layers of liver and other ingredients. Have a layer of potatoes on top. Add one cup stock or boiling water. Bake 1 to 1½ hours.

APPLE CRUMB PUDDING

8 to 10 apples
¼ cup sugar
Cinnamon
¼ cup butter
¼ cup brown sugar
¼ cup flour
Peel the apples and cut into thin slices. Pile in a buttered baking dish and continue until the dish is almost full. Sprinkle with ¼ cup sugar (white or brown) and cinnamon. Prepare the crumbs for the top by creaming together the butter, brown sugar, and flour. When this mixture is worked together so that it resembles fine brown crumbs pat it on top of the apples. Bake about 20 minutes or until the apples are soft and the top is a golden brown.

Readers are invited to write to Alice Stevens' Home Service, Fenton, B.C. for free advice on home cooking and household problems. (Please mention this paper).

An order issued by the Ulster Home Office in Ireland forbids cyclists to ride more than two abreast, under penalty of a fine.

Island That Grows

Fantastic Growth Of Island In The Danube River

The case of an island that grows is now concerning the Hungarian legal world.

About 50 years ago the village of Dunapentele sold a little island of three acres to the church community of Dunavecse for a small sum.

Instead of diminishing in size, like other islands in the Danube, the little island grew steadily bigger, and has now attained to about 19 acres.

The fantastic growth of the island has annoyed its former owners, who now claim payment for the acres which have, literally, materialized since its sale.

The church community, on the other hand, refuse to make further payment on the ground that they bought and paid for the whole island. —London Observer.

Will Have Quiet Winter

Young Princesses Not To Be Seen Much In Public

It is no secret that the Queen has been much exercised about the effect on her little daughters of their many public appearances this summer. August at Balmoral was maintained in family privacy, and it is likely that the little girls will make few appearances in the Autumn, says the London Daily Telegraph. In the Christmas holidays, a pantomime, the circus and a fairy play, with one or two children's parties, will naturally be the only occasions when the young Princesses will be seen in public. The Duchess of Kent takes great interest in this branch of their studies and talks French and German with her elder niece.

ARTICLE No. 11

Prevention Of Cancer No. 3
Medical Education

The Hon. Dr. John M. Robb, former Minister of Health for Ontario did a fine job for the medical profession and public by his enterprise in setting up the first Royal Commission on Cancer instituted in any country, and by the subsequent establishment of the existing cancer clinics in that province.

The wealth of clinical material in hospitals of all kinds all over Canada has never been utilized to its full extent. The average doctor, unless he is ambitious enough to secure post-graduate education at his own expense, has heretofore learned little about cancer since he left college. The distribution of the King's Fund, although the amount available is ridiculously small, will afford an opportunity for the Canadian Medical Association to offer access to clinical instruction in hospitals and special cancer institutes.

The Cancer Committee, originally instituted by the Health League, is engaged in the preparation of a booklet for doctors on cancer. In this booklet, the work of men eminent in the various phases of cancer diagnosis, treatment, and the latest developments on the subject will be discussed. In respect to this devastating malady, a new sense of responsibility has arisen in the ranks of the medical profession. The result of this is bound to be seen in the fight against cancer.

In the conquest of cancer, a huge sum of money is needed, money for medical education, for the education of the public, for investigation and research and for the uncovering of the frauds of quack cures. There are enormous hoards of wealth in Canada. Will not our wealthy citizens, none of whose families are immune to cancer, loosen their purse-strings and join in the battle against one of the cruellest diseases which affects mankind?

Next article: Prevention of Cancer No. 4. Education of the Public in Cancer.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: The Health League of Canada, 105 Bond St., Toronto, Ont.

THE FLAVOR LASTS**Great Bear Lake Mine**

Important Pitchblende Find Located At Considerable Depth

What is characterized by President A. LaBine, of Eldorado Gold Mines Limited, as "the most important pitchblende discovery underground since the commencement of operations on the property" is reported from the Great Bear Lake Mine of the silver-uranium producer by Mine Manager E. J. Walli.

"Crosscutting from the No. 2 vein at the 590 horizon with the objective of reaching No. 1, the discovery vein, which has hitherto been completely unknown below the surface, what appears to be the downward projection of No. 1 vein to that depth has been reached," Mr. LaBine states. "Drifting has now continued for 70 feet and has yielded the most important pitchblende orebody found to date on the property. At last reports, the face was still in ore."

When Gilbert LaBine made his original discovery on what is today LaBine Point and the site of one of the greatest potential uranium producers in history, what he found were the surface outcroppings of No. 7 vein. In earlier work with hand steel, a surface pit was opened for a distance of 20 feet and about 10 tons of ore was broken out of the vein. The surface samples were scientific rarities, much sought by museums throughout the world. Geologists who visited the property in the sub-Arctic at various times continued to offer the opinion that No. 1 vein was the principal vein. But development work was first begun on No. 2 vein which showed consistently rich pitchblende and silver as well as copper. This development and the actual operations continued on No. 2 vein, to a depth of 590 feet.

Quite Blameless

A Vermont village pastor, who had a weakness for trout, preached against fishing on Sunday. The next day one of his parishioners presented him with a fine string of fish, and said, hesitatingly: "I guess I ought to tell you, pastor, that those trout were caught on Sunday."

The minister gazed appreciatively at the speckled beauties, and said, "The trout aren't to blame for that."

To tell summer temperatures correctly, a popular science note informs us, all you have to do is count the number of times a tree cricket chirps in a second, and add 40. Another way is to look at the thermometer.

Asia's non-Christian Confucianist Taoist sect had 350,000,000 believers, the largest religious following in the world.

How The Language Grows

The Word Telegraph Was First Used In 1792

The word "televisor" was coined by J. L. Baird in 1925 to describe apparatus for television and was registered by him as a trade mark. On account, however, of the general adoption of the word in the United States and elsewhere to denote any kind of television apparatus, Baird Television, Ltd., has decided to abandon its registration as a trade mark, so that in future there will be no restriction upon the use of the word in connection with television. "Televisor" may thus be used in future as freely as "telegraph" and "telephone."

The word telegraph was first applied by Chappe in France, in 1792, to his invention of the semaphore system of transmitting messages to a distance; and the word telephone was used by Sudre in 1828 for a system of signaling by musical sounds. It was employed in 1844 to describe a powerful wind instrument to convey signals at sea during foggy weather.

Phillip Reis, in 1861, called his ingenious instrument a telephone, so that he may be regarded as the inventor of the name of the modern instrument. Alexander Graham Bell adopted the word in 1876 for his "Electrical Speaking Telephone."—Nature.

Sees End Of Drouth

Professor Predicts Bountiful Harvests For Next Year

Cycle of dry years which has ruined grain lands on the southern Canadian prairies has ended and bountiful crops likely will be harvested next year, it was forecast by Dr. Frederick James Alway, famous Ontario-born agronomist at Edmonton, in an interview.

Dry years occur in definitely traceable cycles, he said, and "the one which this year has" caused such dreadful ravages throughout the grain belts of Canada and the United States is ending now, probably is already finished.

"I am prepared to state without hesitation that it is likely to be one of the wettest, most productive crop years in decades, and it is a pleasure to be able to make such a forecast with sincerity after witnessing what I have seen in Saskatchewan this summer," asserted Dr. Alway, professor of soil chemistry and chief of the division of soils at the University of Minnesota since 1913.

Dentist: "There's no need to make all that fuss, sir. Why, I haven't touched your tooth yet."

Patient: "No, but you're standing on my corn."

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper, Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

The Undiscovered Mineral Deposits of Northern Canada Challenge to the Prospector

The Northwest Territories, covering more than one-third of all Canada, has undiscovered mineral deposits to challenge the adventurous spirit of the explorer and the prospector for many years, Dr. Charles Cammell, deputy minister of mines and resources for Canada, said at Vancouver.

Dr. Cammell was addressing the joint convention of the Canadian Institute of Mining and Metallurgy and the American Institute of Mining and Metallurgical Engineers.

He said the success mining development already had to its credit in the area "must make us regard the Northwest Territories not as invested in snow and ice but rather as a plant that is burgeoning in the spring."

Dr. Cammell, who is also commissioner of the Territories, said the aeroplane had greatly extended both the period and range of the mineral prospector's activities in the far north.

Topographical and geological mapping was speeded up when the plane broadened the prospector's field of activity, but as yet hardly any intensive prospecting has been done outside the western part of the Territories, except here and there along the Hudson's Bay coast and to some extent inland. Dr. Cammell said, however, minerals were known to occur.

He said the westerly part of the mainland of the Territories, in the Mackenzie district, was making headway in the development of its mineral wealth, but even this district received little recognition until the Norman oil field was discovered in 1920, 100 miles south of the Arctic circle.

Dr. Cammell said 1929 was the "true turning point in the affairs of the Northwest Territories," because in that year mineral exploration companies demonstrated the aeroplane could be used to advantage in northern latitudes. Subsequent success of efforts to extract radium from pitchblende deposits east and northeast of Bear Lake had shown mining could be profitably carried on in the northland, he said.

The deputy minister said discovery of gold last year on the east shore of Gordon lake, 50 miles northeast of Yellowknife Bay, "may prove very important." He said many veins had since been uncovered all around the lake, and "most of the work to date has given gratifying results."

Dr. Cammell said at least 3,000 square miles of the country south of Great Slave Lake was "easy to prospect," because the veins of mineral-bearing ore can be readily observed from the air because "the rocks stand out in bold relief owing to the absence of overburden."

Not The Right Type

General Gave Reason For Sending Officer Back To England

Death of Brigadier-General E. P. Crozier recalled to the London Evening Standard one of his "weeding out" processes in a brigade he took over in France.

Many officers were sent back to England. One asked why.

The general said he just didn't think the man the sort of officer he wanted.

"Why, sir?"
"You just don't fit in."
"Why not, sir?"
"Every week you get a pot of Devonshire cream from home don't you? And every week you eat it all by yourself and never offer a spot to anybody. That's enough. You're not the type I want. Good-bye."

Something New In Time

Clock That Struck Up To 102 Bewildered Farmer

An Ontario farmer bought a large mantel clock, one of the kind that strikes the hours and half hours. That night he was awakened by the striking of the clock. Something had gone wrong with the mechanism and the chimes, instead of stopping with the usual 12, kept right on sounding. The bewildered farmer counted them up to 102, and then awakened his wife.

"Mary, for goodness' sake, get up! It's later than I've ever known it to be before!"

Hooch, a prohibition term for whisky, is a contraction of the Alaskan word hoochin, which is applied to a rum distilled from sugar and flour.

When a butterfly emerges it is apt to walk a few steps to a better position, and there it rests an hour or longer, until body and wing tissues harden.

Life On The Prairies

Has Many Compensations Which Make It Enjoyable

A generation ago Ontario boys by the hundreds came west on harvest excursions and returned to tell the old folks on their hundred acre farms of the lavish grain production of the fast farms of the prairies. In many instances the whole family would migrate westward, having sold their land, stock, implements and other belongings.

In discussing the changed situation the Searforth Expositor, located in Huron county, which furnished many families to the westward movement says:

"We have never experienced a flood. We have never experienced a drought. We don't know what a dust storm is. We have never seen drifting soil. Shade trees line our streets; the lawns are green; the gardens are a riot of color. In the country the trees are larger, more imposing, and they are of every kind. The pastures are green; the crops are growing so fast you can almost see them grow. That growth spells abundance—abundance everywhere."

A green, pleasant, and lush land for comfortable, complacent, easy-going people forsooth. But, we have seen—

A prairie fire a mile wide traveling faster than a man could run; Land dissolved into a foaming yellow froth by floods, and pouring into a swollen river, leaving behind holes that would contain a large house;

A tornado and felt the mighty arm of Boreas in its surge across the prairie;

Great forest fires on the ramparts of huge mountains and felt their burning breath;

Fifty square miles of green prairie after a Spring rain;

And mingled with the great Rocky Mountains and looked with awe upon

"Bright-faced Aurora rosy-fingered dawn, Standing tip-toe on misty mountain tops."

And felt cloud-high dust storms, pelting hard, cold, that bit to the bone, heat that burned like a cinder, blizzards that cut like a knife.

The tossing horns above a sea of stampeding cattle;

A vast panorama of wheat extending mile after mile across the level prairies, the green turning to straw color on a late Summer day;

A great land produce in less than a generation grain wealth whose total equals half the value of all the gold stored up in the coffers of the great nations of the world.

We have seen a hard-bitten, fated-fogged people fighting to retain a toe-hold when all the elements seem to be conspiring against them—pioneer people in a tough, pioneer land.

We may have all missed much, so far from the ease, security and apparent contentment of the somnolent countryside of Southern Ontario.

But we have lived, by the gods, we have lived!—Brooks, Alberta, Bulletin.

Cobra Rescues Woman

Killed An Indian Raider Who Broke Into House

A pet cobra rescued its mistress by killing an Indian raider who broke into her house in the village of Gunpur and attacked her, according to stories published in the Indian Press.

The cobra was at the door when the raiding dacoit tried to enter the house. He slashed at it with a dagger and the snake slipped into a nearby rat hole.

A few minutes later, when it saw its mistress being bound and gagged by the dacoit, it slipped out of the hole again and bit his ankle. The dacoit dropped dead a few minutes later.

Another story of a snake that did a good turn comes from Kohat, in the Frontier Province.

The snake crawled out from below a wall and frightened away a number of women who had gathered at an adjacent spring. A few minutes later the wall collapsed over the spring. The women would have been killed if they had remained there.

A short distance from the spring three women were killed and four seriously injured by the falling debris.

'Success is an end to be attained not by doing the things we like to do, but doing the things we have to do.'

Over seven hundred young anglers competed in the Cambridge children's fishing match organized by the Cambridge Angling Society. Some of the enthusiastic youngsters are here shown marching across a bridge over the River Ouse at St. Ives, Huntingdonshire.

Prove Old Tradition True

Observers See Woodcock Carrying Young Birds On Its Back

That age-old tradition, scoffed at during many generations, that the woodcock carries its young on its back has at last been proved true by the British Trust for Ornithology.

A hundred and four observers lying hidden to trace the movements of this shy bird of brads, record having seen woodcock flying with chicks between their wings.

Eighteen have seen the adult bird return to the nest and carry off a second chick.

The woodcock has also been the subject of ringing—having a ring tied onto its leg.

This has proved that the apparent disappearance of the birds from their usual haunts in August until late autumn, when migrants come in from abroad, is not due to emigration but to the fact that they go away for a vacation, leaving their native woodlands for a holiday on moorland or hills.

Ringing has shown that the return of the birds in woodland in late October is not due only to fresh feathered visitors to Britain but in large measure to residents returning to business.

Three Things Needful

Negro Woman Taught Her Children How To Be Useful

"Auntie," said a gentleman who had just learned that the youngest son of his colored cook had been appointed stenographer to a large manufacturer "tell me how you have brought up your children so that each one of them has become so good and useful a man?" "Oh, honey," was the reply, "that's nothing. I had no education and I could only teach them three things—just three things I taught 'em: their prayers, and their manners, and to work."

The first cablegram was sent from London to New York on Aug. 28, 1857.

Crochet Them—They're Quick to Do!

PATTERN 5944

You'll love making this enterprising pup and the cuddly duck—all in crochet—and be more than rewarded with their proud owner's joy. Of course, they're easy to crochet! The pup in loop stitch—the duck in single crochet—are both made in two identical pieces joined with a crocheted band. You needn't worry about laundering—just take off the crocheted covering and wash it. In pattern 5944 you will find a chart, directions and a pattern for animals; illustrations of them and of all stitches used; material requirements.

Obtain this pattern sent 20 cents in stamps or coins (coln preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Network Of Air Lines To Weld More Firmly The Integral Parts Of Empire

Made Official Enemies

Boundary Line Splits Happy Hamlet Community Of Saar Valley Hamlet

The frantic hates of Europe are concentrated into a capsule drama in a little frontier village on the edge of the Saar Valley. Once a happy little community, the hamlet has been split in two by an international boundary commission. Now one side of the main street is in Germany; the other in France. Those who once were neighbors, fraternizing across the street, have been turned into official enemies.

Edward Hunter tells about this village in Coronet Magazine. Those who live on the German side of the boundary may not now cross the road, as they did, to spend Saturday night in the cafe on the French side. They are, under German currency laws, forbidden to take money out of their country.

There is a creamery on the French side of the road. But the women and children across the street must go without butter because of the shortage of fats.

The tobacco store happens to be in Germany. But their neighbors on the other side have to walk a mile and a half to buy tobacco from the nearest French shop.

Housewives do not dare to cross the road for a visit with their neighbors without properly viced passports and the formality of entry as an alien entering a foreign country. Half the children in the town are being brought up to speak German; the other half French. They are not allowed to play together. If a ball rolls across the street it is confiscated by the customs officers and the children may not run over and pick it up.

The account given by Mr. Hunter reads like sheer fantasy. But is there any reason to believe it is not true in every detail? For what is happening in miniature in the village of Naussweiler-Rosbruck (yes, it has two separate names now) is happening all over Europe. The stranger vine of international hate doubtless even more vigorously when allowed to grow at will on a large scale than when developed in a village test-tube.—Financial Post.

Bones Turn To Stone

Case Reported That Is Unparalleled In Medical History

The most expensive consultation ever held in the world pondered the case of a young Cleveland, Ohio, man whose bones, joints, and backbone are gradually changing to a stone-like hardness with complete rigidity setting in.

Dr. Eugene Freedman of Cleveland, presented the case at the International Congress of Radiology as one unparalleled in medical history and frankly asked the 3,000 X-ray and radium specialists attending the congress from all over the world to enter into consultation and advise him what to do.

In spite of every examination which would be made during the past six years, the real cause of his trouble cannot be diagnosed. Dr. Freedman said, and for the past year his bones and joints have become progressively more rocklike. The case was presented, he added, "in the hope that some one may help to elucidate the true nature of the disease."

Alberta's Crop

Promises To Yield Larger Return Than Any Year Since 1929

Despite the adverse conditions of the early part of the season, Alberta's 1937 farm output promises to yield larger returns than in any year since 1929. The heavy rains of the middle of July and the subsequent favorable weather are responsible, along with prevailing prices, for that welcome prospect.

During the past three weeks the Journal has reviewed in its news columns the situation in the principal branches of the province's agriculture. In all of them a marked improvement has been revealed. It is estimated conservatively that the total production will have a value of \$170,000,000 as compared with a little over \$157,000,000 in 1936 and less than \$120,000,000 in 1933, when it reached the lowest point in recent years.—Edmonton Journal.

Watermelons and bread are the main diet of many people in Iran during several months of the year.

October was designated as the "turkey moon" by the Natches Indian tribe.

The British empire, bound together by sea routes, is building new "life lines"—this time by air.

From Hong Kong in the east to Vancouver in the west, Great Britain and the dominions are spreading newly-wrought wings to weld more firmly the integral parts of the commonwealth.

From Southampton it is only five days by air to India, only seven days to Singapore or Cape Town and only 11 days to Port Darwin, Australia. New schedules to be put into effect shortly will take passengers and mail to India in half that time, to Singapore and Cape Town in 4½ days and to Australia in a week flat.

In the yards of British aircraft builders, 28 flying boats are taking shape. Building simultaneously are 12 new airliner landplanes, equipped to carry 27 passengers on long journeys.

British airlines are surveying a route over the north Atlantic to Canada and the United States. Canada shortly will inaugurate its first transatlantic air line. Projected are British routes from Canada's west coast to New Zealand and thence to Australia.

Other European countries are far from idle. Germany, Britain's leading rival on the air lanes, has developed extensive domestic services and competed with France in flying the south Atlantic to Brazil, France, Italy and The Netherlands have large air services outside their own boundaries.

At the close of 1936, air ministry figures showed, Britain had 124 transports in operation, Germany 136, France 87, Italy 78, The Netherlands 46, Belgium 24, Poland 19, Sweden 13 and Norway 12.

In total mileage of routes, Britain led with 26,958. France was second with 23,973; Germany had 23,494, The Netherlands 17,397 and Italy 14,670.

Responsible for most of the empire aviation development is Imperial Airways, Ltd., whose planes during the 12 months ended March 31, 1936, carried 68,373 passengers a distance of 4,550,718 miles.

With associated companies Imperial Airways operates every week in each direction the following services: Five flights between England and Egypt; two to Palestine, Iraq, India, Burma, Malaya and Australia; one to Hong Kong; three to Anglo-Egyptian Sudan, Uganda, Kenya, Tanganyika and Northern and Southern Rhodesia; two to Portuguese East Africa and the Union of South Africa. Daily service is maintained to most of the European capitals.

First Military Bands

Probably Started From Time When Herds Were Used

The origin of military bands is lost in the mists of the past. Musicians used to play at the royal courts, but the first record of musical instruments in connection with soldiery dates from the time when kings used to ride into battle at the heads of their armies, and when the fights were lost and you the king used to meet there and then to parley terms of settlement. They advanced to meet each other preceded by heralds blowing trumpets. Gradually, it is believed, musicians were given some place in the military organization. Being more ornamental than useful, so far as military purposes were concerned, they were dressed in gaudy uniforms. Germany was the first country to officially add bands to the strength of the regiments, some 200 years ago. In warfare they served the purpose of stretcher bearers, and indeed that was part of their duties until the period of the World War. Chiefly the purpose of the bands was to stimulate marching and to pep up men when they became tired.

Up to less than 100 years ago most of the bandmen in the British Army were Germans, and for a long time after that the bandmasters were Germans. However, the British War Office instituted Kipling Hall, which is a training school for musicians, and all the men in the British Army bands today graduate from that institution. — St. Thomas Times-Journal.

"I am very curious to know," said he, "what you would say if I kissed you?"

"If you were really curious," she replied, "you would know by now."

The largest producer of cheese among the countries of the world is the United States.

No one ever develops eye strain looking at the bright side of things.

BY THE WAY

The flavor of an apple pie is greatly improved if the juice of half a lemon is squeezed, over the apples after they have been placed on the lower crust.

A little olive oil rubbed over paper that has stuck to a polished surface softens paper and makes it easier to remove.

Always iron linens on the wrong side. Ironing on the right side destroys the dull finish.

Dip a cork in silver cream and rub on the silver to secure a better polish than with a cloth. Holding on to a cork protects one's hands from the ugly black stains.

EARMARKING TAXES FOR HIGHWAY IMPROVEMENTS

The earmarking of \$5,000,000 by the Michigan legislature from the current general revenue fund for highway improvement probably marks the first instance in which a state has arranged a continuing appropriation from its general revenue for this purpose.

The \$5,000,000 bill was passed June 10 and had earlier been passed by the Senate. There was also a bill before the legislature to appropriate \$2,000,000 from the general revenue fund each year to go to the counties, to be used exclusively in highway improvement, and a bill of \$600,000 for snow removal.

The theory back of these appropriations bills was that a good share of receipts of the state's sales tax, which go into the general revenue fund, comes from the sale of cars, tires and accessories, and should go to keeping up the roads.

Total receipts from Michigan's gasoline tax and auto license fees go to the highway department, there being no diversion. Net total receipts from the state motor fuel tax in 1936 were \$25,739,000.—Cont.

A wooden stool of correct height for the housewife should be found in every kitchen. Dishes may be washed, ironing done and vegetables prepared just as well while one is sitting as when standing.

Any leftover bits of chicken, meat or vegetables can be added to scrambled eggs and served for luncheon or supper.

Peach stains may be removed from a linen table cloth if it is first soaked in glycerin, then washed in hot soap suds.

QUINTE QUIPS

Mrs. Westbrook is home again from Viking hospital but is still unable to be up.

Miss R. Westbrook and Mr. J. McArthur were Sunday visitors at the R. E. Westbrook home.

Mr. and Mrs. R. Brickman returned Sunday from Saskatchewan where they have been visiting relatives and friends.

Miss C. Lawes spent last week with her parents north of town.

Don't forget to keep Friday evening, the 22nd of October, free, to attend the chicken supper at Quinte. A good supper and program has been arranged.

There is to be a sale of vegetables and home cooking in Brown's garage Saturday, Oct. 2nd, from 1 to 5 p.m. There will be all kinds of vegetables and a general supply of home cooking. Come and buy your Sunday dinner. This sale is sponsored by the Quinte ladies' auxiliary.

Mr. W. Barber of Irma, and Mr. E. Barber of Shawville, Quebec, were visitors at the Garden and Hodgins' homes last Friday.

Mr. and Mrs. Clarence Swain of Luseland, Sask., are making their new home in the place known as the Roland home, three miles west of Quinte.

Mr. J. Heslop returned to his position in the oil fields Monday, after spending a week here with his family.

HOME COOKING SALE

SATURDAY, OCTOBER 2nd
A home cooking and vegetable sale will be held in Brown's Garage under the auspices of the Quinte Ladies' Auxiliary on Saturday, October 2nd, from 1 to 5 p.m. Come and get what you need.

Viking News Items

The M. Pisci building, one door south of the Viking hotel, was completed last week and is now occupied by B. W. Runyon as a barber shop and billiard hall, and a beauty parlor under the management of Miss "Pat" Ronnigan. The new building is one of the finest structures of its kind between Edmonton and Saskatchewan. Its dimensions are 25 ft. by 95 ft., built of concrete and the construction throughout is as fireproof as can be made. Geo. Thompson had the contract but was finished by our local contractor, Mike Johnson. There are two separate entrances, one to the pool room and one to the barber shop and beauty parlor. In connection with the pool room a soft drink stand is maintained where the usual brands of soft drinks, chocolate bars and cigarettes may be purchased. In the billiard hall are two snooker tables and three pool tables. The whole building is well lighted and presents a most inviting appearance. The barber shop is under the management of Mr. B. W. Runyon and his son Cecil who are well skilled in their trade.

Miss "Pat" Ronnigan is the petite operator in the ladies' beauty parlor. The building is a credit to the business section of our community and we trust that Mr. Pisci's confidence in making this addition to our town is well founded.

Bob McEwen, former member of the bank staff here and now assistant manager of the New Edmonton Breweries, Mr. McPhee, manager of the same concern, Jas. Guthrie, salesman for the Imperial oil company, and Mr. Huntley of Edmonton, were guests at the Viking hotel over the week-end.

They were making a tour of this part of the province. They spoke very highly of our local hotel and travelled a long distance on Saturday to get here. Bob called on a number of the old-timers here whom he knew when he was employed in the Merchants bank, now the Bank of Montreal. At a meeting in Killam an organization has been formed by the towns under contract with the Calgary Power Co. for power and light to endeavor to have the rates lowered. Considerable enthusiasm was shown by representatives from Fort Saskatchewan, St. Albert, Daysland, Broderheim, Lamont, Killam and Viking. A permanent organization will be made some time in October by all towns in Northern Alberta, the meeting to be held in Edmonton.

The members of the Elks lodge, their wives and lady friends, enjoyed a corn roast in the hall last Friday evening. Chas. Brickman furnished the corn and there was plenty for all. A social evening was spent in singing and cards after the corn feed. Percy Main, exalted ruler, ate the most corn. (This is subject to correction, says Percy.)

Roger Brickman of Phillips district, brought in a carrot to this office last week with five points on it that makes it look like a human hand. A carrot crop this year, we are informed, is fairly good, but there are few freaks such as Roger brought in. It is on display in our office. It will actually shake hands, says Roger, but we are not responsible for statements made by others. At that we would just as soon believe anything that Roger says.

Geo. L. Hudson, former Conservative member of the legislature for Wainwright constituency, now hotel inspector, was in town last week giving the local hotel the once over. A large crowd is expected at the track meet to be held in Wainwright on Friday, October 1st. The place is Wainwright fair grounds and the time 10 a.m.

Monday, October 11th, is Thanksgiving day. Stores and business places will be closed all day, it being a national holiday.

Mrs. M. Hyslop who has spent a number of days in the hospital has improved sufficiently to return to her home.

Harry Cartwright is out of the hospital where he had been receiving medical attention.

The sad news of the untimely ending of Harry Massey, employed here for three years by A. A. Long, reached us last week. Harry was fighting fire near Vernon, B.C., when a large tree fell and he was unable to escape. He was killed instantly. Harry Codd, his employer during the summer, had his body returned to Notch Hill, B.C., and interred in a nearby cemetery. A large funeral proved the esteem in which he was held. His parents, brothers and sisters reside in England. He was a general favorite here, always pleasant and courteous.

September 22nd the rain fell steadily all day. It will help fall plowing but was no benefit to the saving or ripening of the oat crop.

The Ed. Codd children are having a tough time with whooping cough, especially the baby who has had medical attention continuously.

Petrovski Bros. moved their threshing rig to Dick Daniel's but have been held up by wet weather.

CANADIAN NATIONAL

SPORTS

Much has been said against girls engaging in strenuous sport, the argument being that such unfits them for motherhood. Proof of the lasting good basketball did Winnie Martin, was evidenced in a picture of her family. Winnie has six children, who appear perfect in feature and health. She was formerly a star performer with the Edmonton Grads, displaying agility and stamina of a most remarkable degree. Basketball would thus appear as an ideal game for girls, producing good health.

The race in the Big Leagues is almost over. They are now coming down the home stretch with the leaders so far in advance the winners are known. Once again the Yankees and the Giants will be in the World Series. Fans will merely hop a street car to see the games in the American or the National park. It is but a short time before business throughout North America will actually stand still for a couple of hours daily, while the United States and Canada listen to the radio. It is an actual thrill, unsurpassed by any other sport.

The papers are warning up to Hockey, telling us of a list of new rules that look good for speeding the game and preventing stalling and "tricks". This year Viking will miss the name of Clem Loughlin in the headlines, while the "Iron Man of Hockey" has also decided to retire to the ranks of the business men. With the opening dates of the "Season" set for November 4th in Toronto and Chicago, we must conclude that winter is coming in the very near future.

The other night 50,000 fans gathered in New York to see a carnival of boxing that promised much. Champions, bantam to middleweights, displayed their wares. During four hours of furious fistfights there was nothing startling to report. They hoped about the ring like a bunch of chickens, but failed to entertain the crowd with anything worth noting in the line of class performance. The spectators were disappointed in the dullness of the display.

Friday night the Edmonton curling club staged a tournament of table tennis. The big rink near the high level bridge was the scene of spirited competition as the little celluloid pucks shot through the air like meteors. This game is one of the most exciting to play and to watch, and is worthy of a place in every home and club. It can be made the fastest of all games.

NOTICE

To Ratepayers of the M. D. of Kinsella, No. 424.

Take notice that any person requiring relief must appear before the whole Council at their regular meeting, and that no relief shall be granted under any consideration until such person requiring the relief shall have appeared before the Council and has completed the necessary documents.

By order of the Department of Municipal Affairs and the Council of the Municipal District of Kinsella No. 424.

BLAKE H. GREEN, Sec.-Treas., Mun. Dist. of Kinsella No. 424.

NOTICE

Notice is hereby given that all Seed Grain advances made by M. D. 424 must be repaid on or before the 12th day of October, 1937.

By order of the Council.
BLAKE H. GREEN, Sec.-Treas., Mun. Dist. of Kinsella No. 424.

Reduced Rail Fares for Thanksgiving Week-end

Winnipeg, Sept. 30.—Special low Rail fares will be in effect between all stations in Canada for the Thanksgiving Day long week-end, according to an announcement by R. Creelman, passenger traffic manager, C.N.R.

Tickets at the low fare of single-fare and one-quarter for the round trip will be on sale from Friday noon, October 8, until 2 p.m. Monday, October 11. Where there is no train service on Friday afternoon, tickets will be sold for the Friday morning train. All tickets will be good to return leaving destination up to mid-night of Tuesday, October 12.

These low fare tickets will be honored in all classes of accommodation and, Thanksgiving week-end will be the last long week-end holiday before Christmas vacation, the railway is looking forward to a large volume of traffic between local points.

L. M. Hart Elected President of White in Canada

Heads Truck Factory in Montreal and Dominion's Sales Organization of Branches and Dealers.

Montreal.—L. M. Hart, of Montreal, was elected president of The White Company, Limited, manufacturer of White and Indian trucks and buses in Canada, at a meeting of the board of directors held here today.

The announcement was made by Robert P. Black, president of The White Motor Company, of Cleveland, whom Mr. Hart succeeds as head of the Dominion company. Mr. Black continues as chairman of the board of directors of the Canadian company.

"Mr. Hart's election to the presidency comes in recognition of his 21-year record with the company in Canada," Mr. Black said. "As vice-president, he has been the manager, director of the White organization throughout the Dominion for several years. He was personally responsible for the establishment of a Canadian White factory, at Montreal, and under his supervision the company's sales have grown to a point where every third truck in the Dominion in White's capacity range is a White.

30th Anniversary

"This year marks the 30th anniversary of White in the Dominion. In 1907, the company's first branch was opened at Toronto. Today, there are branches and distributor organizations in all important cities in the Dominion.

"With a sales increase of 64 per cent over last year, White is confident that this anniversary year will be its most successful year in Canada. The Montreal factory is expanding its production facilities to meet the demand for the recently announced lower-priced models, the only quality trucks in the low-price field, as well as to provide additional

volume in the heavy-duty field, in which White has always enjoyed leadership."

Native-Born Canadian

Mr. Hart is a native-born Canadian. His rise to the presidency of his company is a colorful story. As a young man, 24 years ago, he sensed the future of the automotive business, then in its infancy, and started as a White dealer in Edmonton, in 1907. In the intervening years he has become widely known as an engineering authority in the truck and bus fields. Due to his advanced ideas, Canada is recognized today as leading the world in modern streamlined body designs.

Introduced Sakhnofsky

Mr. Hart introduced Count Alexis de Sakhnofsky, internationally noted authority on streamlining, to the truck field in the Dominion, and with Sakhnofsky as stylist, produced the world's first streamlined trucks for the National Breweries, Imperial Oil, Labatt Brewery and many other leading fleet owners of the Dominion. These designs have since been copied in the United States and elsewhere. Because of this, Mr. Hart is credited with having started an entirely new trend in truck design by streamlining for greater efficiency from a practical operating standpoint as well as giving owners the benefit of the advertising value of beauty on the highway.

Railway Officials Inspect Canada's First Road-Rail Car

THE first tests to be made in Canada of a new type of automobile vehicle which links highway and railway will be commenced within the next two weeks on branch lines in the three regions of the Canadian National System. The first of these "Auto-Railers" which will be tried out on branch lines in Ontario and Quebec, is now ready for service. It was inspected recently by S. J. Hungerford, Chairman and President of the Canadian National, and a number of headquarters officials. Photograph shows John Roberts,

Chief of Motive Power and Car Equipment, pointing out to President Hungerford the flanged wheels which are let down or drawn up to change from road to rail operation. This operation is controlled from the driver's seat and requires only one minute's time. In the group (left to right) are N. B. Walton, Chief of Transportation, Mr. Hungerford, Mr. Roberts, and R. L. Fairbairn, Manager, Passenger Service Bureau.

In addition to the three passenger road-railers one freight carrier for use on either road or rail will be tried out.

In announcing the purchase of this equipment Mr. Hungerford emphasized that the move was of an experimental nature and was intended to permit of tests being made on various sections of the system as to the adaptability of these cars for use in Canada. It is believed they will cut down operating costs very considerably on light traffic branch lines and at the same time give better service to the public dependent upon such lines.

Congo Red

A Common Dye Proposed As A Remedy For Cancer

A common dye, congo red, was proposed, as the newest tool of medical science in the fight against cancer.

Two New York physicians, Dr. Isidore Arons and Dr. Boris Sokoloff, told the international congress of radiology that they had found that the dye materially slows down the growth of cancer.

It has been found, the New York specialists said, that the dye apparently stimulates the activity of some of the blood cells which fight disease, and the disease defence mechanisms of the spleen, lymph glands and bone marrow.

They suggested to the radiologists assembled from 30 countries that congo red can be used with great advantage by combining its use to stimulate the disease-resisting functions of the body with X-ray and radium treatment.

A new automatic robot pilot, designed to remove all guesswork from X-ray treatment, was announced by Dr. Gustav Bucky, of St. Louis, before the congress.

Dr. Bucky, who previously invented a diaphragm on a different principle, which is now a universal appliance, explained his new device is similar to the automatic gyroscopic pilots which control airplanes in flight in that it eliminates the human factor. "The universal dosimeter" works on a different principle from the automatic pilot, however.

It is called an "ultra-sensitive electrometer" and is a tube which measures the quality and quantity, including the intensity of X-rays emanating from the X-ray tube. The electrometer tube is hooked back to the source of electricity feeding the X-ray tube and controls exactly the dose of X-rays set by the physician with a single dial.

The congress voted to hold its next meeting in 1940 in Berlin.

Members of the congress were offered a scientific crossword puzzle on cancer by Sir G. Lenthal Cheate of London, and Dr. Max Cutler of Chicago. The puzzle is to be taken home by the members as a lesson to be answered, if possible, at the 1940 meeting.

The puzzle is: Why do Chinese coolies in Sumatra have cancer of the stomach frequently while the Japanese coolies there seldom have it? Why does cancer of the skin account for 70 per cent of all cancer in southern France and in Australia—a much higher incidence than in other countries? Why is cancer of the stomach more frequent in rural communities than in cities? Is cancer of the breast so much less prevalent in Japan because Japanese mothers nurse their babies for long periods? Is cancer of the organs due to racial susceptibility, individual susceptibility or the external habits determined by habits and customs?

Lost Radium

Scientists Have Developed A Method Of Locating It From A Distance

Thieves were warned at Chicago against trying to steal the most precious thing in the world—radium.

Even if they could get away with it from the closely guarded lead vaults of medical institutions they could never hide it, Dr. Robert B. Taft, of Charleston, S.C., said at the international congress of radiology, and the chances are that it would burn a hole in their pockets and themselves.

Because radium sometimes does accidentally get lost, science has developed a method of locating it from a distance.

The device is a variation of the Geiger-Muller counter used to measure cosmic rays and with it the scientist can walk down a street and tell in which house radium is hidden or walk along above a city sewer and tell exactly where the tiny tube containing a month of a gram is located. Electrons shooting off from the radium excite the counter so that it either flashes a light or "sounds off" in a loud speaker.

Robes For Exhibition

Lord Gowrie, the governor-general, has received a message that the king and queen are sending their coronation robes for exhibition throughout Australia from January to April, 1938. The robes were exhibited at the royal school of needlework, Kensington, and were on view in the royal Scottish museum, Edinburgh.

The hottest place in the world is reputedly Azizia in Tripoli, where the mercury hits as high as 136 degrees in the shade.

The kangaroo hops 25 feet and can clear a nine-foot fence.

Thirty-one cities of the world have more than 100,000 telephones.

FRANCE OPENS MAMMOTH AIRPORT

A general view of the new airport buildings at Le Bourget, just outside of Paris, as seen from the aerodrome. This is by far the largest and most modern air terminal in Europe.

Future Achievements

If Judged By Past, Much Can Still Be Accomplished

It would be a great and valuable experience if every man, once during his life-time, could sit over there on Mars for half an hour and get perspective on this world's workaday affairs. But probably that will be impossible—for a few years at least. The next best thing is to sit at the feet of Sir James Jeans, the English scientist.

He suggests in "The Universe Around Us," as you may recall, that to see ourselves and our generation in proper relation to the past and the future, we should like a postage stamp and stick it on a penny. Then climb either of Cleopatra's Needles (one stands on the Thames Embankment in London, the other in Central Park, New York City, and each is about 70 feet high) and place there, on the penny, stamp side up. If the height of the whole structure be taken as a scale to represent the time elapsed since the earth became the earth, the thickness of the penny and the stamp represents the time that man has lived on the earth, and the thickness of the stamp the time that man has been civilized.

Now, suggests Sir James, stick on another stamp; it corresponds to 5,000 years. Then another stamp, another, and another, until you have a stamp column as high as Mont Blanc, France, which is 15,782 feet high.

"Even now," Sir James will tell you, "the pile forms an inadequate representation of the length of the future which, so far as astronomy can see, probably stretches before civilized humanity unless an accident cuts us short. The first postage stamp was the past of civilization. The column higher than Mont Blanc is the future. The first stamp represents what man has already achieved—the pile which outtops Mont Blanc represents what he may achieve if his future achievement is proportional to his time on earth."—Rotarian Magazine.

Flying Foxes In Australia

Their Camps Are One Of The Wonders Of Nature

Flying foxes have been in the Australian news lately, because of an invasion by these big fruit bats, says the Australian Press Bureau. In Queensland and New South Wales there are millions of flying foxes, and their camps are among the wonders of nature. A typical camp has a population of 20,000, but nearly 25,000 bats resort to a well known rain-forest area in Queensland, where a mighty Banyan tree forms the "capital." An amazing city this, of winged fox-headed mammals, which actually darken the sky when they stream forth, at six o'clock, on the nightly trip to the feeding grounds, miles away.

Prefers Everyday Stories

Teacher Thinks Fairy Tales Not Good For Children

Little Red Riding Hood and Jack the Giant Killer are not fit companions for the child of pre-school age, in the opinion of Miss Esther Mason, who teaches in the nursery school of Temple University, Philadelphia. Realism, not fantasy, is Miss Mason's idea of literary fare for youngsters.

Mothers should tell youngsters about the children who went to the big city, rode 'on an electric train, saw the high buildings and bought a streamlined car in a toy store, she says. Such stories, says Miss Mason, are fascinating to children.

She has found the children like to hear stories about the day's procedure, especially if the children themselves are characters in them. And repetition doesn't bore them; it enthralms them, she reports. A favorite story book tells of a family of father, mother and two children. For the names of the children in the book Miss Mason substitutes those of children in the group.

Illustrated story books are best, she says. Even a large picture book of familiar subjects, without an accompanying story, will do. Enough conversation results from recognition of a pair of shoes or a toothbrush to provide story material.

"It is essential to have a great deal of repetition in any story," Miss Mason asserts. "Children forget so easily."

A Rothschild Story

Late Lord Rothschild First Of Family To Borrow Money

Perhaps the special distinction of the late Lord Rothschild was not that he had the finest private zoo in the island but that he was the first Rothschild who borrowed money. The story is that on one occasion when he had decided to buy an expensive group of animals for his zoo he borrowed money outside for his purpose. He did not care for his people to know of that extravagance and did not want to disturb his bank account. Somehow the story got about and was considered the joke of the year. This was about 40 years ago.

The story reminds one how the great Duke of Wellington paid Sir Allen £5,000 in notes for his Waterloo pictures. The artist politely expostulated a cheque at any time would have done. "What—do you think I want Coutts to know what a damned fool I've been?" asked the Duke.—Manchester Guardian.

A traveller went up to a railway porter at an important station and said: "There are half a dozen clocks in this place, and they are every one different!"

"Well, sir," said the porter, "if they were all alike, one would do!"

Accommodation Limited

King George Uses Library At Balmoral To Transact Business

The visit of the king and queen to Balmoral prompted The London Evening Star to give the following behind-the-scenes information on how a royal castle is run:

"Balmoral is comparatively limited in accommodation, and the king has no definite workroom as he has at Buckingham palace or at Windsor castle. His Majesty, like his father, uses the library for audiences and receptions and generally to transact business with his ministers. The library is comfortably furnished with armchairs and at a desk near the window overlooking the Dee valley His Majesty does his personal correspondence.

"When a cabinet minister arrives a footman is specially detailed to wait on him, and to those who have not been to the castle before this servant is always of great value in keeping the guests primed as to the routine of the day. "Ministers are not expected to accompany the king on shooting expeditions. They can golf, or be driven around. Decide or join the king, as they like.

"The king usually receives the minister in the evening between tea and dinner, when they meet in the library, and no one is then permitted to interrupt."

Useless Inventions

Many Gadgets Don't Pan Out According To Specifications

The "other" side of inventors' lives—the gadgets that don't pan out according to specifications—came to light at the National Inventors' congress in Des Moines, Iowa.

Someone invented a tail-coat to keep cows' tails out of the eyes of milkers. (Switching cows' tails put out 1,810 farmers' eyes last year, the inventor said.) The device held the tail in check, but caused "bossy" to kick. So the inventor applied hobbles. That made bossy so mad that she wouldn't give any milk.

Then there was a "perpetual motion" mouse trap. Each victim set the trap for the next. None of the mice was hurt. Sometimes the trap collected 25 mice in a single night. But when the housewife saw 25 live mice all at once—

No one came forth, however, to challenge practicality of the "snore eliminator." This tin device fits over the teeth, makes breathing through the mouth impossible.

A bath tub seat swivels out over the edge of the tub. The bather may seat himself in comparative safety and by proper manipulation raise himself up over the rim of the tub and deposit himself lightly in the water without danger of skidding on the soap.

Locomotives made in Germany will be used on railways in China.

Prairie Trails

Old Coach Roads Of Early Days Are Disappearing

"Like the stage coach that was hauled over them in the early days by horses, the old stage coach roads are disappearing from Alberta.

In the early 80's, all fast travelling in the west was done by stage coach. There was very little trouble on most of the roads although stories of robberies on a big scale have grown up. Robberies did take place but not so many as often recounted, according to some of the old-timers at Calgary.

One of the major routes was the Calgary-Macleod-Lethbridge run that usually required two days. The coach started from Calgary, hit south-easterly and ran through Minnapore, High River, Mosquito Creek, Granum, Macleod and Lethbridge.

When the roads were in good condition, four horses were used. On bad stretches, however, six horses were usually harnessed. The driver was in full charge and horses were changed frequently on the long, rough road.

Value of the old coach road disappeared when the railway lines cut across the prairies and began to jut branch lines north and south. Now the well built highways are taking further value of old roads away.

Pushed into disuse by modern transportation methods, the old coach roads gradually were fenced over by settlers and ploughed under to grow wheat and other grains. Now, after 40 years, the original stage coach road linking Calgary, Macleod and Lethbridge has all but disappeared. In a very few years more there may be no evidence left of the historic route.

Ban On Parades

Scotland Yard Stops Political Marches In East End Of London

Scotland Yard announced the ban on political marches in the East End of London has been extended three months.

The three-months ban was due to expire but the statement issued by Scotland Yard said:

"The Commissioner of Police, with the approval of the Home Secretary, issued an order reimposing the ban on the same area."

Neil Francis-Hawkins, director general of the British Union of Fascists, which planned a march through the area to celebrate the fifth anniversary of the founding of the union, characterized the announcement as a Government surrender to the forces of "Jewry and disorder." The ban, first imposed June 22, affects the chief centres of Jewish population in the East End.

"I suppose you know why I stopped you, Miss," said the country policeman, seriously.

"Yes," said the little pet in the car. "You're lonely."

Interesting Fossils

Discovered In Montana, Scientists Decide They Lived Seventy Million Years Ago

Man, instead of having descended from the monkey, probably ascended from a four-inch long, tree-dwelling animal which was the ancient granddaddy of all mammals on earth today.

This conclusion, arrived at by Dr. George Gaylord Simpson of the American museum of natural history, is based on a lengthy study of a collection of fossils from a large area just east of the Crater mountains in central Montana. It may indicate man's origin was in the western United States rather than in Asia.

Dr. Simpson has just published through the Smithsonian institution a study of these ancient animals, the remains of which were collected between 1908 and 1932 by Albert C. Silberman, of the States geological survey, and the late Dr. James W. Gidley, of the United States National Museum.

From the rock strata in which the fossils were found the scientists decided the animals lived in a period 70,000,000 to 100,000,000 years ago. Thus they were flourishing and going through successive stages of evolution 40,000 times longer ago than the period since Christ was born.

Man would hardly claim these creatures as the blood-brothers which Dr. Simpson declares they are. They were only about the size of a mouse, but they were true mammals—animals which gave birth to fully developed young and nursed them to maturity—in contrast with the egg-laying dinosaurs and other beasts which preceded them.

They were among the earliest of the primates, the particular order of things to which man, monkeys, the apes and lemurs belong.

They were either the true ancestors of man and the monkeys or were one of the experimental branches of natural evolution which stemmed out from a still older line which produced the forerunners of man. In either case they must be classed as related to man, Dr. Simpson declared.

A Matter Of Courtesy

United States Band Leader Was Introduced As They Do It

A correspondent of the Toronto Globe and Mail noted that the leader of a naval band from the United States, playing at the Toronto Exhibition, was introduced to the crowd as "lootenant," and he wondered why. "Would a Canadian band leader," he asked, "in a United States town be introduced as 'lootenant'?" He thought not.

A second writer, commenting on the letter, advanced the theory that the word is "lootenant" in the navy and "lootenant" in the army, in British, Canadian and American forces.

The second writer has been misinformed. Naval and army officers in Ottawa never have heard the "loot" form in the United Kingdom or Canada, and the dictionaries confirm their opinion that its use is confined to the United States. Webster's says the American pronunciation is "lu", adds that "in British usage usually, and in the United States occasionally, 'loot'." The Oxford calls it "lu", adding that the U.S. form is "lu".

There is no question that "lootenant" is the proper and accepted form in Canada, but we cannot agree that it was incorrect to introduce the American band leader as "lootenant." That is the title by which he would speak of his rank, and it is the manner in which his superiors and his associates address him. It is a matter of simple courtesy to address him, in this country, by the form he accepts as correct.

Recently a radio commentator, speaking from the United States, discussed the English derby and the Kentucky derby, calling one of them the derby and the other the derby. Such scrupulous accuracy is a commendable thing.—Ottawa Journal.

In cities, snow is covered with a layer of dirt and soot which darkens its surface and makes it melt faster, because a dark surface absorbs more heat.

The yolk of an egg contains a high fat content in the form of oil, and also lecithin, an important substance useful in aiding growth and for nourishing nerves.

The University of Oxford is said to have been founded by King Alfred in 872.

Visitors to Florida spend between \$200,000,000 and \$300,000,000 annually in that state.

At its noon time, the temperature of the moon is 250 degrees Fahrenheit.

THE NEW TROCADERO IN PARIS

The scaffolding around the Trocadero has been taken down, and the building now appears in its finished state. This is the largest public building constructed in Paris in recent years. This photograph was taken from the second platform of the Eiffel Tower.

YELLOW
BRIARA Story of the Irish on the
Canadian CountrysideBy PATRICK SLATER
By arrangement with Thomas
Allen, Publisher, Toronto.

CHAPTER XI.—Continued

The Marshall family were honestly concerned about my condition of health; but I told them I had got medicine to take, and, worse luck, I produced the bottle. The dose was a tablespoonful night and morning before meals. Miss Elizabeth saw to it that I took my medicine. It was horribly-bitter astringent stuff.

"I read on that label that it is good for most every ailment, Patrick, even for fainting spells," the solicitous young woman told me, with a smile. "So perhaps it will cure you!"

I kept away from the house and threw my body into hard work in an attempt to burn the fever out of my system. I can sincerely recommend a daily walk of eighteen miles between the handles of a bucking plow to any young man who is love sick—to be followed by a rest of eight hours on a hard bunk.

A day or two before Christmas that year, Samuel Arnold drove up the lane to make his expected visit on Miss Elizabeth Marshall and her family. Mr. Marshall was away to town. So I stepped out to do the honors and took the young gentleman's team. Mr. Arnold said he would go with me to the stable. It had been a long, cold cutter ride for the man—the snow crunched under foot. He came muffled up with fur cap and robes, but on alighting, his legs were stiff and numb with the cold. He threw his arms around me, I found, was to dandify himself up for an effective stage entrance at the house. Off came the fur cap; and on he clapped a high silk plug much affected by the young Irish gentry of those days. The smart young man was wearing plain blue plush stripes and a black frock coat with two buttons at the small of the back. As he fingered his bow-tie and turned to walk towards the house, it occurred to me that I might do him a kindly turn. He seemed a civil young man. He had come a long way, and was entitled to a good run for his money.

"Pardon me, sir," I said to him; "but the Marshall ladies have a prejudice against tobacco chewing. Perhaps you better wipe your chin and rid up the corners of your mouth a little."

Mr. Arnold took the suggestion kindly.

"And perhaps, too," I told him, "you better leave your plug with me. You might be forgetful and take a chew unbeknownst to yourself like!"

I carried his grip up to the house and ushered him in the front way, which had been freshly shovelled for the occasion.

That was one festive season the Marshall parlor gave useful service for its idle keep. Mr. Arnold prided himself on his deep singing voice; and his idea of a good time was to have Miss Elizabeth play hymn tunes for him on the melodeon. The man's voice vibrated the wire stems on the wax flowers and penetrated the remote fastnesses of the Marshall house. After several days of it, the committee rose and reported progress. Mr. Arnold apparently leave to sit again at a later date. Mrs. Marshall thought him an agreeable young man. William Marshall had tried him several times, but never struck sparks strong enough to light up a discussion of any kind. Mr. Arnold pulled on his fur cap and drove away with a cordial invitation to come again.

The Rev. James Berry—that incorrigible matchmaker—wrote the bread-and-butter letter. He reported that the young man was very favorably impressed.

Arnold returned to the Marshall farm in lilac time. As luck had it

Miss Letitia was present to make his acquaintance. On the occasion of this visit, the young man's mind was not on hymn singing. He had driven over to make arrangements about getting married. He was surprised and disappointed when Miss Elizabeth told him that, at the moment, she was not thinking of marrying any one.

It then transpired that Rev. Mr. Berry, in the heat of match-making, had overstepped his instructions and that the clergyman's limber tongue had placed young Arnold in a very awkward predicament. All his friends and neighbors over home had been told the match was made, and the whole countryside knew that Arnold was now off to the details of getting married to Miss Elizabeth Marshall of Mono. An awkward affair that, was it not? Arnold argued his side of the case with great vigor, and spent a couple of days trying to persuade the young woman to take a reasonable view of the situation. Elizabeth did not see matters in his light. Aunt Letitia spoke her mind strongly on the wisdom of the girl getting a good husband with a two-hundred-acre farm all clear, now that the opportunity presented itself. It was a bit of pressure was brought to bear on Elizabeth, but she was adamant. Altogether, a very unhappy time had one. Finally Miss Letitia was of her weak spells; and Samuel Arnold threw up his hands and asked that his team be got ready for the road by two o'clock in the morning.

Mr. Marshall asked me if I would mind lending a hand by having the visitor's team ready at that unearthly hour. That was no task for me—it was a downright, joyful pleasure. I gave the Arnold horses data enough to send them streaming down the road; and then I took a walk off somewhere—I was horribly distressed in spirit.

On returning, I found the house in darkness. The air was mellow with moonlight and vibrant with the rapping, pulsing hum of the tree locusts. At the gate of the snappy new picket fence, which now totters on its time-worn way, I found the cause of all the family trouble awaiting me. The girl was in her bare feet and her hair had tumbled down from a loose coil. "Why, Miss Elizabeth," said I, "I thought even you would be in bed to get Mr. Arnold's team ready for him."

"Oh it's heart-broken I am," she told me with a choke in her voice. "Now, now, Betty," said I to her, "I thought you would be in bed. Shadows will all flee away with the fairness of the morning."

"If that old thing, Letitia, would only mind her own business," she sobbed, "I know Ma would leave me alone."

"But I don't want to marry that conceited thing—with his singing!" she burst out.

"The man might make you a good home," I counselled, "his folk are highly spoken of."

"But I don't want him!" she sobbed. "I don't want him at all. It's you I want, Paddy!"

The girl's face got tangled up in her bare arms and seemed to blind me. I could feel the sobbing shaking the curves of her soft, warm body. It was Betty taught me a woman's tears have a salty taste.

"Oh! take me," she whispered, "never to forsake me—because I love you."

"Now, now, girl," I told her after awhile, "you'll always have Paddy as a last resort. Sure, child," said I, "you'll never be a left-over like your grand-aunt Letitia—I'll guarantee that!"

The thought touched a funny spot and broke the spell the moon was casting.

"I don't know why they are all so much concerned about my affairs," she complained, "why don't they leave a girl alone to live her own life? They must want to get rid of me!"

"Well," I said, with a chuckle, "they'll all be damn well concerned about your affairs, Elizabeth Ann, if that Aunt Letitia of yours spies you standing out here in the moonlight with your arms about the neck of a no-account Irish papist!"

"Oh! well, anyway, you clumsy sweetheart," she smiled at me through glistening tears, "it's me culpa, Paddy, and you won't have to tell your ghostly father, John Sheridan, anything about it."

With that, she fled into the darkness house.

"Come, Bob," said I, when at last I got my breath back, "let us go and think this matter over."

It was clear as day what was the matter with Paddy Slater. He was hopelessly in love with the woman whose fresh young heart had burst open, like a flower, in wild surrender

JOYS
and
GLOOMS

ED MERRILL, DO YOU REALIZE THAT YOU'VE BECOME THE MEANEST OLD GROUND IN SEVEN COUNTIES?

WELL, WHAT'S THAT SAY... IF YOU HAD MY NERVOUSNESS AND COULDN'T SLEEP, YOU'D BE GROUNTY TOO!

30 DAYS LATER

WELL... I'VE GIVE YOU TWO LOVE-BIRDS MY BLESSING!

IT'S CHANGED MA SINCE HE GOT RID OF HIS NERVOUSNESS AND SLEEPLESSNESS! TO POSTUM FOR HIM!

THEY LOOK TOO BLAMED HAPPY! ARE WE GOING TO STAND FOR IT?

NOT COME ON BLOODS! GET THOSE JOYS!

YOUR NERVOUSNESS AND SLEEPLESSNESS ARE CAUSED BY CAFFEINE-NERVES, AND YOU KNOW IT—BECAUSE THE DOCTOR TOLD YOU SO!

CHEER UP—THE COFFEE!

YOUR MONEY BACK—IF SWITCHING TO POSTUM DOESN'T HELP YOU!

WHAT'S THAT YOU WANT TO GET HARRIED? I'VE WELL—I SHOULD BE NOT GRACE—GO TO YOUR ROOM AND GET YOUR YOUNG MAN—GET OUT AND STAY OUT!

WHY DON'T YOU QUIT TEA AND COFFEE AND SWITCH TO POSTUM FOR 30 DAYS, LIKE THE DOCTOR SAYS?

ALL RIGHT! HAVE IT YOUR OWN WAY!

If you are one of those who cannot safely drink tea or coffee... try Postum's 30-day test. Buy a tin of Postum and drink it instead of tea or coffee for one full month.

If... after 30 days... you do not feel better, return the tin of the Postum container to General Foods, Ltd., Cobourg, Ont., and we will cheerfully refund the full purchase price, plus postage!

Give Postum a fair trial... drink it for the full 30 days!

Postum contains no caffeine. It is simply whole wheat and bran, roasted and slightly sweetened. Postum comes in two forms... Postum Cereal, the kind you boil or percolate... and Instant Postum, made instantly in the cup. It is economical, easy to make and delicious. You may miss tea and coffee at first, but after 30 days, you'll love Postum for its own rich, full-bodied flavor.

Cor. 1937, King Features Syndicate, G. F. Ltd. Licensee

there. In the hot heyday of his youth, his blood was tingling with a love sickness of which a country lad once sang:

"My beloved is unto me as a cluster of flowers in the vineyards of En-gedi... Behold thou art fair, my love, behold thou art fair! Thou hast doves' eyes... Thy teeth are like a flock of sheep that are even short, which come up from the washing... Thy two breasts are like two roses that are twins, which feed among the lilies... Thy lips drop as the honeycomb; honey and milk are under thy tongue; and the smell of thy garments is as the smell of Lebanon... Stay ye me with cakes of raisins, comfort me with apples; for I am sick of love!"

—Holy Bible.

And Paddy Slater knew what unhappiness that love would bring to a family to whom he was honored bound by ties that smothered about the heart of a lonely barefoot orphan boy. Now, I ask you, all and sundry, what should the miserable lad have done?

I hung about the house till long after two o'clock in the morning. I could hear the heart-broken swain snoring soundly; dragging... how over his base cord like a regular fare-you-well. Evidently the man was snugly till breakfast call. I went into my own room and packed up some working clothes in a clean grain sack.

Bob was waiting for me at the kitchen door. He was a crippled dog, worn out with the weight of his years. I felt heart-scalded to be leaving him, and I knelt down to try and explain matters.

"I'm off on a long journey, Bob, my friend," I told him, "but I shall hear the heart-broken swain snoring soundly; dragging... how over his base cord like a regular fare-you-well. Evidently the man was snugly till breakfast call. I went into my own room and packed up some working clothes in a clean grain sack."

Bob was waiting for me at the kitchen door. He was a crippled dog, worn out with the weight of his years. I felt heart-scalded to be leaving him, and I knelt down to try and explain matters.

The phrase "ticked to death" originated in a Chinese torture, when criminals had the soles of their feet tickled until they died in an agony of laughter.

Two-thirds of the earth's surface is covered by water.

AMERICA'S CHAMPION COLLIE DOG

Lochinvar, (Ireland of Glams) America's champion collie dog, wants to get in which his mistress, Miss Cherry Osborne of Long Island, New York, played at the Banff Springs Hotel recently. Lochinvar, himself worth \$5,000, is able to earn the meagre salary of \$50 per day as a movie star in Hollywood.

To Encourage Capital

Large Portion of British Columbia Still Undeveloped

Premier T. D. Pattullo told a convention of Canadian and United States mining men British Columbia wanted to encourage capital investment because a "great portion of its area was literally unprospected."

The premier was addressing a luncheon meeting of the joint convention opened by the Canadian Institute of Mining and Metallurgy and the American Institute of Mining and Metallurgical Engineers.

He said Port St. James was located at the geographical centre of the province, but that almost the entire area north of that point was undeveloped.

Mr. Pattullo mentioned briefly the cordial relations between Canada and the United States. He warned his listeners that "we may think ourselves safe from attack but don't forget there can never be a major world conflict without this continent being drawn into it."

He referred briefly to the proposed annexation of the Yukon Territory by British Columbia, commenting: "and we may go farther than that before we get through."

Will Follow The Sun

Portable Classrooms In London's New School Construction Scheme

Classrooms which will "follow the sun" are the sum of the London county council's new school construction scheme to be started next year.

The buildings will be of light and adaptable construction, with sliding walls, sun-roofs and portable classrooms.

Foot-baths, showers, toothbrush brigades and rest periods on portable beds will be part of the daily program.

Cooks With Sun's Rays

Using twenty panel mirrors, a California genius has devised a sun-cooker which is not only capable of cooking meats and vegetables with the sun's rays, but can generate a temperature as high as 1,000 degrees, hot enough to melt several metals.

The steel industry in the United States alone spends more than \$9,000,000 a year on research.

Foresees Big Airliners

Will Accommodate 150 Passengers States Designer Of Flying

A trans-Atlantic airliner capable of accommodating 150 passengers will be built "before long" in the opinion of Oswald Short, designer of Imperial Airways' flying boats.

The liners would weigh 150 tons and have motors which would develop 6,000 horsepower. Caledonia and Cambria, the Atlantic trail blazers, weigh 19 tons and have accommodation for 30 passengers.

Short declared there would be no technical difficulties in constructing such large ships, but engines of sufficient power would take time to develop. "The latest commercial aircraft built at present develops only 1,500 horsepower."

The Short plant at Rochester, Kent, has already turned out 22 of the "Imperial Airways" order for 28 ships by the end of this year.

Short began as a balloon enthusiast but after Orville Wright's successful flight started building aeroplanes. In 1926 he scrapped wood construction as obsolete and built the world's first metal flying boat.

Good Roads For Alberta

Province To Have 700 Miles Of Hard Surface Highways By End Of 1938

Alberta government expects to have 700 miles of hard surfaced roads in the province by the end of 1938, according to present plans, Hon. W. A. Fallow, minister of public works, announced.

All but a few miles of the main highway from the international border to Edmonton would be hard surfaced by the end of 1938 construction season, he said.

"Blotting" of roads is proceeding at the rate of 10 to 12 miles a week and it is expected 150 miles will be completed this year, the minister stated. About 150 miles were processed last year.

Previously hard surfacing had cost from \$10,000 to \$12,000 a mile, he asserted, but the government now was hard surfacing at a cost of not more than \$2,500 a mile. The new type of hard surfacing was similar to work now being done in the United States, he added.

A Quick Convert

A Communist agitator rode into Hyde Park, and later leaning his bicycle against the railing, mounted a soap box and proceeded to address the crowd.

"If your family is hungry," he shouted, "raid a shop and take food for them, and don't care what anybody says. If your wife hasn't got a coat, pick the best fur coat you can see, and ignore the consequences."

After several more minutes in this strain, he dismounted from his soap box, and his next words were:

"Where's the scoundrel who took my bike?"

Film Director: "The lion will pursue you for a hundred yards—no farther. You understand?"

Actor: "I understand—but does the lion?"

Little Helps For This Week

Fear ye not, stand still and see the salvation of the Lord which He will show to you to-day. Exodus 14:13.

The folded hands seem idle, But if folded, His word It is a holy service, In obedience to the Lord.

It is not the multitude of hard duties, it is not constraint and contention that advance us in our christian course. On the contrary it is the yielding of our wills without restriction and without any choice, to tread cheerfully every day in the path where the Lord leads us, to seek nothing, to be discouraged by nothing, to see our duty is the present moment, and to trust all else without reserve to the will and power of God. Godliness is the devotion of the soul to the Master, as to a living person whose will is to be its law, whose love is to be its life. It is the habit of living before the face of God, and not simply the doing of certain things.

For Public Weal

Plan To Make Medical Services Available To All Classes Of People

Challenge to the medical profession in Alberta to take the lead in formulating some plan whereby medical services would be made available to all classes of people and at a cost within their means, was made at Edmonton by Dr. T. H. Leggett of Ottawa, president of the Canadian Medical Association.

The science of medicine has advanced so rapidly, while medical economics has been almost standing still, that a serious disequilibrium has been created," Dr. Leggett asserted at a luncheon meeting of the annual convention of the Alberta branch of the association, and the College of Physicians and Surgeons of Alberta.

One of the leading tasks facing the medical profession in Canada was correction of this imbalance, Dr. Leggett emphasized.

A Japanese Pastime

Listening To Songs Of Insects Was Considered Soothing

The traditional Japanese pastime of listening to the songs of insects is threatened with extinction. Films, radio, jazz, cafes and sports provide the entertainment of modern Japan. For years regarded as a soothing comfort, the song of night-singing insects, captive in delicate bamboo cages, are appreciated by comparatively few. One known dealer still handles many bell insects, and during the spring and summer months as many as 100,000 are sold.

Almost every Japanese of moderate means owns three or four times as many pictures as he has room for on the walls of his home. They switch 'em around according to the seasons.

Great Britain's longest electric railway has just been opened between Waterloo and Portsmouth, in England, the non-stop train covering the 74 miles in 91 minutes.

Fall Bedding

Equip your Beds NOW with these snug, cozy Flannelette Bed Sheets and defy this chill Autumn air.

LOCALS

Mr. E. W. Peterson is on jury duty in Edmonton this week.

Mr. and Mrs. A. C. Hockett and family have moved into the J. R. Love house.

Mr. V. Hutchinson is busy this week building a new house at the rear of his lots.

Don't forget Miss Samenuk is giving one free permanent on her next visit. Your's may be the lucky number.

A carload of vegetables donated by Irma and district residents is being loaded today (Wednesday) for shipment to the dried out area.

Mrs. L. Walter of Owen Sound, Ont. accompanied by Mr. Walter, visited this week at the home of her son, Mr. W. N. Frickleton.

There will be a tea and sale of home cooking and supper served by the Anglican W.A. in the Foxwell Block on Saturday, Oct. 2, 1937.

Mr. and Mrs. Clarence Stuart and family of Calgary spent last week visiting relatives and friends in Wainwright and Irma, returning home on September 29th.

The Irma hockey club are putting on a big dance in Kiefer's hall, Irma, on Thanksgiving evening, October 11. Merta's Lone Star Rangers of Viking will supply the music.

Miss Marion Longmire has returned home and will teach music in place of Miss Staggs. Quite a number, both in Irma and Wainwright, are taking lessons from Miss Longmire.

The October meeting of the Irma Social Credit Group has been postponed, but on Monday, Nov. 1st, the annual meeting of the group will be held which all members are asked to attend.

Miss Margaret Szoke will be in Irma doing permanents at the home of Mrs. Bert Long and will remain for a week, beginning Saturday, October 2. Prices \$2.50 to \$5.00. Appointments may be made with Mrs. Long. 1p

A general meeting of the Irma Branch, Canadian Legion and the Ladies' Auxiliary will be held on Saturday evening, October 2nd, at 8 o'clock, to make plans for Armistice Day. All members are requested to attend.

You will make no mistake in waiting for Helen Samenuk, permanent wave expert. She has had 12 years experience and in that time has taken a number of special courses, thereby gaining first class knowledge of the latest machines and the best waving solutions.

NOTICE

In the Estate of John A. Bars, late of the district of Irma, in the Province of Alberta, Farmer, Deceased.

Notice is hereby given that all persons having claims upon the estate of the above named John A. Bars who died on the 11th day of August, A.D. 1937, are required to file with Layton H. Bars, Irma, Alberta, by the 23rd October, 1937, a full statement duly verified of their claims and of any securities held by them; and that after that date the executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 30th day of September, 1937.
C. G. PURVIS,
Solicitor for the Executor,
Viking, Alberta.
